

October 25, 2007

Dear Fellow Carwash Owners and Operators:

The Southeastern Carwash Association is very concerned about drought conditions that are affecting parts of the Southeast. We are working to assist car washes in working with their local and state governments to ensure awareness of the steps being taken to conserve water by professional car washes.

Currently, Georgia has formed the Georgia Chapter of the Southeastern Carwash Association to maintain a voice in Georgia. They are working to establish funds to support their efforts. SECWA is supporting the committee in Georgia and other members throughout the Southeast with their questions and suggestions.

Read about water saving practices by SECWA members and communication points that may be of use on our website at [www.SECWA.org](http://www.SECWA.org).

We will also be featuring speakers and educational session on water shortage and the issues surrounding it at our Regional Road Shows in Baton Rouge (February 17-18, 2008) and Richmond (June 8-9, 2008) as well as at our Fall Convention & Expo (September 14 – 17, 2008).

If you have any questions or issues surrounding the current water shortage issues, please feel free to call SECWA Headquarters at (800) 834-9706 or e-mail [SECWA@SECWA.org](mailto:SECWA@SECWA.org). Together, we will find an amicable solution.

Sincerely,

Dan Thompson  
SECWA President
