Press Release

For Immediate Release: November 4, 2008

RPM Manufacturing introduces new EZ VAC Combination Detail Vacuums to the Car Wash and C-Store Markets.

Innovative Combination Vacuums provide economical alternative to car wash and convenience store owner/operators.

Cedar Rapids, IA: RPM Manufacturing, Inc. today announces the introduction of its EZ VAC Combination Detail Vacuums to its EZ VAC Vacuum & Detailing Equipment line.

RPM Manufacturing's EZ VAC Vacuum & Shampoo Combo and EZ VAC Vacuum & Fragrance Combo units offer a number of new and innovative design features that provide maximum security, durability, easy installation, and better serviceability for value-minded owner/operators seeking economical, uncomplicated, yet dependable and theft-resistant equipment.

The new combination vacuums feature a theft-resistant, high-security locking door, a digital display/timer with countdown feature/last coin alert, and are available with or without a bill acceptor. Patrons can choose between the Spot Removing Shampoo and Vacuum on the Vacuum & Shampoo unit and have a choice between two Fragrances and Vacuum on the Vacuum & Fragrance unit.

With the EZ VAC EZ Install Mounting Bracket, installation is streamlined and pre-mount installation can be achieved. An integrated circuit board incorporates electronic components including power terminals, fuses, and relays in a compact, reliable, all-in-one device eliminating complicated wiring, excessive components, and costly replacement parts. With the built-in on-board EZ Diagnostic service LEDs, servicing and diagnosing fuses, relays, and incoming power and motor line power status is made simple.

"The EZ VAC Combination Detail Vacuums were designed to fill a void for affordable yet high quality, economy-class combination units", says RPM Manufacturing's president, Bob Woodard. "Now car wash and convenience store owner/operators can offer premium self-serve impulse car detailing services along with their vacuums at their sites without investing a tremendous amount of money."

"Owner/operators have been asking for appealing, reliable, secure, yet affordable combination vacuums, but expensive equipment available in the market today has prohibited them from being able to make the investment in such equipment", states RPM Manufacturing's vice president of marketing and sales, Greg Stebral. "The EZ VAC Combination Detail Vacuum line, offered by RPM Manufacturing through its rapidly expanding distributor network, now provides those car wash operators an economical, affordable, and

viable alternative where they now have an opportunity to better compete in the market by offering premium services at their car washes at a reduced investment.”

#####

RPM Manufacturing, Inc. specializes in the design and manufacture of high-quality commercial-grade vacuums, detailing, and tire inflation equipment for the car wash, convenience store and fleet maintenance detail industries. Its management team has 25 years of experience in the industry and the focus of their products is to provide ease of installation, cost-effective aftermarket integration and replacement, and low-cost serviceability over their useful life.
